

PROJECT OF GREEN BUS STOP IN BIAŁYSTOK

IDEA DESCRIPTION

The main idea of our project is to raise awareness and try to make Białystok greener using plants growing in pots as well as green roof which provides shade, removes heat from the air, and reduces temperatures of the roof surface and surrounding air. Moreover the design of it easily fits the surrounding area. All in all green bus stops is an innovative solution that fulfills many functions and directly contribute to a healthy urban living.

LOCATION

Zwierzyniecka/świerkowa 15-312
